

Sameto AG Drive Pvt. Ltd.

Blender

V Blender

- V-blenders are designed for intensive mixing action as the V-shell rotates the products in a repetitive division and mix-together action.
- Most application for powders having good flowability and mixes powders in short time.
- V-blenders upto 1000Ltrs volume can be produced on a single pedestal/stand
Advantages are (a) Machine takes up less room & (b) Machine can be easily installed through wall.
- Working volume upto 50% of total volume.

Bin Blender

- Bin Blenders are highly efficient blending containers due to their irregular shape.
- Versatile Bin Blender consists of pillars, rotary cage, hydraulic lifting mechanism, locking arrangement, drive arrangement, breaking system for perfect positioning of bin, safety sensors and a PLC control.
- Easy interchangeability of bins for processing different batch volumes.
- Maximum total volume upto 3000 Ltrs.
- Working volume upto 60% of total volume.

Double Cone Blenders

- Double Cone Blenders provide an efficient but gentle blending action.
- Mixing time will be a bit longer, but mixing efficiency is good.
- Blending action can be intensive by providing asymmetric cones. (Due to irregular shape.)
- Optimum performance can be yielded by keeping the internal angle of lower cone as 60° (also ensuring a good product discharge)
- Working volumes are 60% of total volumes.

Drum Blenders

- Drum Blenders are most convenient blending containers.
- Also these Blenders are most economical compared to other types.
- Blenders can be free-standing or through wall installations.
- Easy to handle and a good blending performance
- Capacities range upto 750 Liters maximum.

Sameto AG Drive Pvt. Ltd.

OCTAGONAL BLENDER

- Widely used in API's due to irregular shape yielding higher blending actions in short times.
- Low Power consumptions.
- Hygienic design & smooth interior for CGMP cleaning.
- Charging & Discharging through butterfly valve-manually or pneumatically.
- Bin charging system with trolley provided.
- Working volumes upto 70% of total volumes.
